## *Milking Shorthorn Dispersal*

*34*  
*year* tradition of  
*Quality Breeding*

*Delavan, Wisconsin--May 11 and 12, 1962*

*Friday = Farm No. 2 = 11:00 a.m. CST*

*Saturday = Farm No. 3 = 12:00 Noon*

**BORG FARMS**

*Milking Shorthorn Dispersal*

*Delavan, Wisconsin*

**A 34-YEAR TRADITION OF QUALITY BREEDING**

# PROGRAM

**Friday - May 11 - Farm No. 2 - 11:00 A.M. CST**

**Saturday - May 12 - Farm No. 3 - 12:00 Noon CST**

(Index by animals' names after Lots 228-229)

**130 Cows**

**40 Yearlings**

**40 Two-year-olds**

**7 Herd Sires**

A large group of heifer and bull calves will be offered, as well as several lots of steers.

\$10.00 CERTIFICATES TO 4-H AND FFA

## AUCTIONEERS

B. B. Allen, Ravenna, Ohio  
W. E. Dixon, Springfield, Mo.

Les Gerner, Whitewater, Wis.  
Walter Kruse, Sheldon, Iowa

WIN A HEIFER CALF....All 4-H and FFA youth are invited to enter the Essay Contest sponsored by Borg Farms. Write an essay of 150 words or less on "Why I Would Like to Own a Borg Heifer." A heifer calf will be given to the winner on the second day of the Borg Farms sale. You must be present to win. Send your entries to the American Milking Shorthorn Society office by April 25, 1962.

Make your reservations at any of the following motels: Lake Lawn Hotel and Motel, Ed and Rita Motel, Kline Motel, Colonial Hotel -- all in Delavan; State Line Motel, 5 miles west of Delavan; and many other motels around Lake Geneva.

GEORGE W. BORG

George W. Borg was born October 24, 1887, at West Burlington, Iowa. He died February 21, 1960. Mr. Borg was one of the men who came to the front when leadership and prestige were needed by Milking Shorthorn breeders. Borg Farms enjoyed 34 years of progress.

Mr. Borg served the American Milking Shorthorn Society as president in 1935.

"Nowhere in the pages of fiction can be found a success story that so stirs one's emotions as the record of Mr. Borg's achievements."

## FOREWORD

*It is with sincere regret that we come to the Dispersal Sale of Borg Farms. Theoretically, the dispersal of such a herd throughout the length and breadth of the land may be a contribution to breed progress because of the resulting wide distribution of excellent material among breeders in all sections of the country. Actually, the good which comes from such a scattering of promising individuals can only be in direct proportion to the ability of the numerous purchasers to carry on the work of improvement under varying and changed conditions, as compared with what might have been accomplished by the retention and continuation of the herd as a unit. One can never contemplate such a herd dispersion without experiencing a feeling of sincere regret.*

*Thirty eight years ago Dr. Robinson of Alean, Michigan, purchased the Farm which was then known as the Tilden Farms. The writer moved here in January of 1924. We brought along with us some 40 head in all of Milking Shorthorn, mostly of Glenside bloodlines. Among them was Walnut Ridge Lady.*

*From a daughter of this cow, Tilden Farms Lady, came one of the best bulls in the breed at that time, Walby Duke. Fanchion was another great cow, who gave 12,040 lbs. milk and 484 lbs. butterfat. The herd bull was Corporal Walby, by Corporal Clay.*

*Dr. Robinson held the Farm for only one year and then sold it to S. A. Ingersol of the Ingersol Steel Company, who held it for four years, and in 1929 Mr. Ingersol sold to George W. Borg.*

*With the purchase of the Farms, the pure-bred herd of Guernseys, numbering 170 head, were sold at auction. It was decided to replace the Guernseys with grade Shorthorn. Some of these were purchased in Minnesota and northern Wisconsin. These cows were large, big, long cows, and it is interesting to note that Glenside sires had been used mostly in these grade herds.*

*About this time the Glenside Herd was to be dispersed, and it was purchased in its entirety and brought to the Farms. Some of these cows were Vera Strange, Glenside Red Bess, Florence Rose's Queen, Glenside Lily*

Waterloo, Glenside Cranford Lily, Glenside Waterloo, Glenside Christmas Gem, Glenside Ruberta, and several other large, roomy cows. The sire was Glenside Dairy King 2d. This bull was large, deep, and straight, but rather high on legs, and it was argued that with the use of this type of bull on the Glenside Herd, which was somewhat on the dairy type, the daughters might be of strictly dairy type. This was an error for the Farm and an error for the breed, as Dairy King's daughters retained were of excellent type and heavy producers and, above all, had excellent udders.

Imported Anderson Messenger was purchased, along with four females. One of the cows was Priceless Daisy, who left the best daughters, of which we have in the sale now—Borg's Priceless Daisy 10th, a great granddaughter.

The next step was the purchase of the Northwood Farm Herd, 115 head, with Northwood Pride 4th, a sire of many, many show cattle and with 71 RM daughters. Also imported Bladen Minstrel 8th, 48 RM daughters. From this bull comes the Rose W family, who have proven themselves in production, one generation after another.

From the Northwood Herd comes the Susan family—Northwood Susan 6th—we used to call her the cow that thinks. This cow produced 75,449 lbs. milk and 3,118 lbs. butterfat, during a life of traveling and fitting for shows. This cow won some 30 blue ribbons, and 6 Grand Champions. The herd is strong in the Susan family, just having registered the 140th.

The White Mountain Herd of 47 head was purchased, but this herd did not prove out as well as the Glenside and Northwood, and it was culled and disposed of.

In later years, two imported bulls were added. Iford Earl Gwynne 25th came from the J & H Robinson herd, Lewis, Sussex, England. He was a son of Iford Princess Gwynne 47th, one of the best-uddered cows

that I have ever seen in England, or this Country. Unfortunately this bull was killed by lightning, when 6 years old. We have several of his daughters in the herd.

The other imported bull was Fothering Foggathorpe Furnisher, bred and owned by E.C.J. Allday, Peterborough, England. This bull is Classified EX and will be in the Sale. His dam, Fothering Princess Foggathorpe 14th, one of the great producers of the breed, dairy-type head and neck. Lifetime record of 139,000 lbs. milk. From this sire comes many grand cows and heifers, which will be offered in the sale.

Only the best bull calves were kept for breeding. The rest were castrated and fed out. These steers, at an average of 22 months would go in the market weighing an average of 1100 lbs. and it is rather interesting to note that the steers were always in demand and nearly always purchased by small packers, on the Milwaukee market, for the reason they know how well they dressed, with little waste.

Now, we come to the end, and these good cattle will be disposed of, distributed to many points of the Country, and I can sincerely and truthfully say that these cows will go out and give a good account of themselves. The Borg Farms are situated in the center of large industries, and labor has been a problem; and due to the changing of labor, the cows are capable of making larger and better records than have been done.

I am happy that I have had a small part in developing this herd. It will likely be many years, if ever, that a herd of this size and quality-classified, where lifetime records have been kept—will be offered at a public sale.

We do hope that old breeders and new breeders will attend and take a part in this great event.

Edwin Evans, Farm Manager

**THE DEATH OF GEORGE W. BORG** was a source of regret to all Milking Shorthorn Breeders. He not only had been President of the American Milking Shorthorn Society but had developed and maintained for many years on his fine farm near his home in Delavan, Wisconsin, under the management of Edwin Evans a fine herd of Milking Shorthorn cattle. Mr. Borg, one of those comparatively rare men, who when he saw something that was needed and useful, but not available, possessed in full measure

the courage, resourcefulness and drive to undertake to make it available. Born in Central Illinois, he was interested in agriculture and saw the need for dual purpose cattle on the average farm of the country. So he became at an early date interested in Milking Shorthorns. His father had a machine shop. At a time when there was no good or satisfactory automobile clutch in service he undertook to invent such a clutch. He succeeded and was afterwards called "Mr. Clutch." He also possessed in rare degree a combination of

genius as an inventor with great and outstanding business skill and judgment in management.

He developed a good Milking Shorthorn herd and then he purchased—this was after the death of L. D. May—what was then the Glenside herd. Later he bought the noted Northwood Herd and White Mtn. Herd. The best animals from these herds were placed in the Borg herd and from time to time he pur-

chased the best bulls, American bred, Canadian and imported, that were available and so he left a large herd of good Milking Shorthorns which is now to be dispersed. It is to be hoped that they will be widely disseminated and go to new homes where they and their progeny will strengthen and improve the quality of Milking Shorthorns.

John B. Gage

**THE SALE OF BORG FARM** and the dispersal of this great Milking Shorthorn herd are matters of historical interest. Few herds of any breed have had a longer continuous and successful existence. It is the largest herd of the breed in America if not in the world.

It is distinctive because it was started and carried on by the purchase of top herds in their entirety, thus acquiring the product of many years of constructive breeding.

Among them was the Glenside Herd developed by L. D. May and owned by Mrs. May. With this purchase came the great cows Glenside Roberta, Glenside Christmas Gem, Glenside Lily Waterloo, Glenside Minnie, Glenside Dora, Glenside Princess Bess, Miss Water Lily and Glenside Lady Waterloo, an International winner. These cows had a background of breeding and performance going back to the 1880's. After trial and error we

know today that the progress of the breed would have been enhanced if we had more generally followed the policies and practices of Mr. May.

Borg Farm has perpetuated the bloodlines and after 38 years nearly every animal in the herd carries some degree of Glenside blood. Another fine lot of cattle were acquired in the purchase of the Northwood Herd.

One could elaborate at length on the success in the showing and in production and the great bulls bred and imported.

Borg's Wild Duke has 59 RM daughters, Borg's Pride 7th 28. Borg's Bladen Minstrel 2nd 27 and Borgs' Knowsley Duke 2nd 41 just to name some of those in Vol. 46 of the year book. The herd is above average in butterfat.

Many new herds should be established from this sale.

W. Arthur Simpson

**I HAVE KNOWN THE BORG HERD** for many years, first, through the Milking Shorthorn Journal, then as an employee of the American Milking Shorthorn Society. Sixteen years ago I first visited the herd, and began to see Borg cattle and their influence in other herds from coast to coast.

Mr. Borg was a successful inventor and industrialist with world-wide fame, but he was also a successful farmer and stockman. He probably loved his farm and livestock at Delavan, Wisconsin, as much as any phase of his business.

He expected the farm to be handled on a practical business basis, and used good judgment in selecting Mr. Edwin Evans as farm manager, who had the same philosophies as Mr. Borg. Mr. Evans has made the farm show a profit through the years, operating under a well-balanced farming program fitting to southern Wisconsin.

I have seen Borg cattle perform much better in other herds than they would have at Borg Farm. That is easy to understand. In smaller herds the cattle receive more of that personal touch. At Borg Farm it was rather commercial. Any time 200 milking cows are placed in three barns, they become numbers, but in the individual family size

barn each is an individual. When the cow needs a little personal attention she gets it. Therefore, there is justification for the statement: "Borg cattle have done better for their customers than they would have done on the home farm."

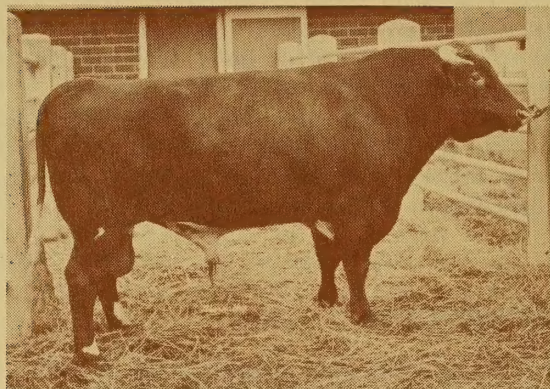

Borg Farms have always been good Milking Shorthorn steer promoters and feeders, and have established the good demand at the Milwaukee Stockyards for Milking Shorthorn steers. In this sale there will be several pens of Milking Shorthorn feeder steers which should be attractive sale day.

In all probability this will be the largest offering of registered Milking Shorthorn cattle in our lifetime. I would expect some fairly high tops. Just remember there are around 300 head of cattle to sell, and that means there will be plenty of bargains. Any buyer using good judgement will purchase cattle that will prove to be a good investment. That was always the philosophy of Borg Farms. Their cattle should do well for their customers.

I am honored to be a part of the sale's force in this sale, and it is my desire to serve both the seller and buyer. I shall see you at the sale.

W. E. Dixon, Auctioneer.

## Repurchase Agreement

1. Proper care must be given by purchaser to protect breeding qualities and health of animals considered to be breeders hereunder.
2. All bulls sold as separate lots are considered breeders hereunder, provided they are not allowed to serve when under 14 months of age or allowed to run with the herd when under 20 months of age. In case of failure of a bull to be a breeder, notice shall be given to the seller within six months of date of sale, or by the time the bull is 20 months of age, if purchased under 14 months of age.
3. Cows with own calves under four months of age by side are considered proven breeders and are not included in this agreement. All other cows and heifers are considered breeders hereunder, except that calves sold by side of the dam as one lot and heifers under 16 months of age at the time of the sale are not considered breeders hereunder. Heifers under two years of age shall not be served by a heavy or old bull. Cows and heifers bred for more than three months according to the service date furnished at the time of sale, but not proving in calf, must be reported to the seller within three months after date of sale; all others served within three months prior to the date of sale, not settled or proving to be in calf must be reported within six months of date of sale. Females over 16 months of age sold open, not settling within six months after date of sale shall be promptly reported to the seller.
4. Any animal defined above as being a breeder which does not prove to be a breeder in conformity to the foregoing qualifications shall be examined by a licensed veterinarian chosen by the seller. If such veterinarian shall determine (a) that the purchaser has not violated any of the foregoing conditions to be performed on his part, and (b) that the animal does not conform to the foregoing terms, the seller at his option may (a) return to the purchaser in cash the amount of his bid for such animal less salvage. The determination of the foregoing facts by said veterinarian chosen by the seller shall be final as to the rights of the purchaser and seller under this Repurchase Agreement. The seller's liability under this Repurchase Agreement shall extend only to the sum bid for such animal or such sum less salvage as hereinbefore provided and seller shall not be liable for damages of any sort including, but not limited to, shipping costs, finance costs, feeding costs or damages arising out of failure to breed, settle or to prove in calf, and seller shall not be liable with respect to any indebtedness or evidence of indebtedness incurred or made by said buyer in connection with any purchase whether or not made or given to Farm Auction Service, Inc.
5. The herds have state certificates of accreditation for tuberculosis and Bang's Disease for many years. All animals are sold subject to a 60-day retest for tuberculosis, or to comply with the laws regulating tuberculosis of the State or Country in which they be shipped. Animals shall be segregated from the buyer's herd until the retest is made, except the herd be a Federal Accredited one. All tests for tuberculosis, either before sale or retest shall be made by a Federal or State Veterinarian, or veterinarian deputized and qualified to do accredited herd testing. Purchase price less salvage to be promptly refunded upon proof of reaction. All animals have been tested for Bang's Disease and tuberculosis and health charts will be furnished with each animal.
6. Permission is granted to purchaser to maintain purchased animals on the sale premises no longer than ten (10) days after the date of sale, provided that seller shall have no liability with respect to such purchased animals after date of sale. The seller shall provide care and feed for purchased animals during said period.
7. Certificates of Registry and Transfer will be furnished with each lot sold.
8. It is understood that the seller makes no representation as to the animals sold, and that it will repurchase said animals in accordance with the terms hereof, if the animal does not conform to the foregoing qualifications pertaining to breeding. It is further understood that this Repurchase Agreement applies only to the natural breeding qualities of animals sold and is not intended to be applicable in the event of the death, injury or ill health of the animal occurring after the time of purchase.

It Is Further Understood that this agreement is made by the co-executors not in their individual or individual corporate capacity, but as executors as aforesaid, and it is agreed by the corporation or by any person now or hereafter having any interest, that no personal liability shall be asserted or enforceable against said executors individually because of or in respect to this agreement. All such liability being expressly waived by the corporation or by any other person hereafter having any interest.

*"Live Salesmen of Live Stock"*  
 MILWAUKEE STOCK YARDS  
 MILWAUKEE

Mr. Edwin Evans,  
 Borg Farms,  
 Delavan, Wis.

March 14, 1962.

Dear Mr. Evans:

We have sold a lot of cattle for you for quite  
 a few years and we find that it helps in selling  
 when we inform the buyer that they belong to  
 Borg Farms.

Your steers have built a good reputation among  
 the packers here at Milwaukee for good yields  
 and a minimum of waste.

We highly value your patronage.

Yours truly,

CLOUGH-COOK & CO.
